1. CONSTRUCTION OF HIGHWAYS

The Communists built a total of 930 kilometers of roads and 160 bridges between December 1945 and the end of January 1946 in the Kiangsu-Anhui Border Area.

Since the cease-fire order issued on 10 January 1946, a total of 1060 kilometers of roads have been built, 428 kilometers of which were built by the hsien governments. As of 1 July, the Fifth Sub-District had built 586 kilometers of road, fifty-seven bridges, and forty-five sluices. A total of 70,252 men were employed in the construction.

The following chart shows the highways constructed in the "Liberated Areas":
(This does not include roads built by the Fifth District /Sub-District?/.)
